## Introduction

The logo is a graphic mark that will be used to identify all the materials generated within the project as part of it.

The design of the logo includes two versions to be used either in small or large applications, and one more version with no description. It also has colour variations for full colour or monochromatic use.

Original files have been uploaded to the intranet of the project in order to make it accessible to all consortium members.

On the first month of the project, the logo have been use in the website, for the social media icons and templates for documents and presentations.
