Introduction

Some templates have been designed in order to use the graphic identity of the project in all the documentation.

1. Word

The word template is mainly for the deliverables. It has a front page with project identification, the information required for each deliverable and blank pages with the logos from NEURICE and the UE and font styles.

Templates are available for all partners on the private area of the website.

Public deliverables will be uploaded at the website:

<http://neurice.eu/public-deliverables-2/>

2. PPT

The template for Power Point standardizes all the presentations used at NEURICE meetings and public presentations. It has a standard layout with the logos from NEURICE and the UE and a blank area for the logo of each partner.

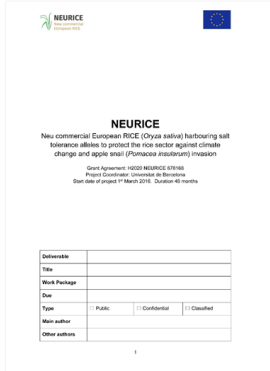

Templates are available for all partners on the private area of the website.

WP6 Dissemination deliverables

PPT templates were used on the Kick-off meeting in Barcelona (28-29/04/2016)

3. E-mail signature

A small size logo have been designed in order to customize the signature of the e-mail. Partners can use it in their communications so people related to the sector will know that they are working at the NEURICE project.

The screenshot shows an email composition window in Catalan. The subject is "Idiomes NEURICE". The recipient is "Cervera, Rafael". The email body contains the following text:

Hola, Rafa
Pots mirar com es canvien els idiomes a la intranet i li contestes al Camilo?
Gràcies!
